---

To Whom it concerns:

I am against glyphosate in all public places: schoolyards, roadsides, parks, community centers, etc. THERE IS NO SAFE LEVEL.

In 1995, I gave birth to a child with anencephale, a fatal condition. It was years later that I found studies done in other countries on the role glyphosate exposure can have in early pregnancy, such as my father spraying Round-Up all over the driveway and other areas of the home I was in, in 1995.

With skyrocketing cancer rates, infertility, and children who won't live as long as their parents, it is a matter of public safety to ban harsh chemicals from public places and share the dangers with the public. Let them know! Post information! Let them walk away voluntarily from private use.

A simple solution of vinegar and soap keeps down plant life equally well, for fire breaks, etc.

Please do not let corporate profits outweigh safety.
